ENVIRONMENTAL MANAGEMENT

MSZ EN ISO 14001:2005

Protecting the environment and our health are of great importance to our company. Regulated with appropriate processes we pay close attention to activities involving hazardous chemical substances and compounds. All hazardous chemical substances and their containers are properly identified.

Flammable Acute, irritant effects Corrosive substance Hazardous for the environment

We practice controlled waste management.
Our main principles regarding waste management:

- Waste is collected separately (selectively for each type) in identified containers.
- We aspire to the highest possible level of recycling of generated waste.
- Hazardous waste is handled with special care.
